

Agentic Cinema

From Screenplay to Production-Ready Intelligence

The Agentic Cinema AI Hackathon

Meet The Agent Crew

Building agentic intelligence for filmmaking production.

A Screenplay Tells a Story. It Doesn't Plan the Shoot.

The Screenplay

"Sarah runs through a crowded street at night."

Storytelling information — vivid, narrative, human.

The Production Questions It Leaves Unanswered

 Location

Street / Outdoor — which one?

 Permit

Required? Who applies?

 Lighting

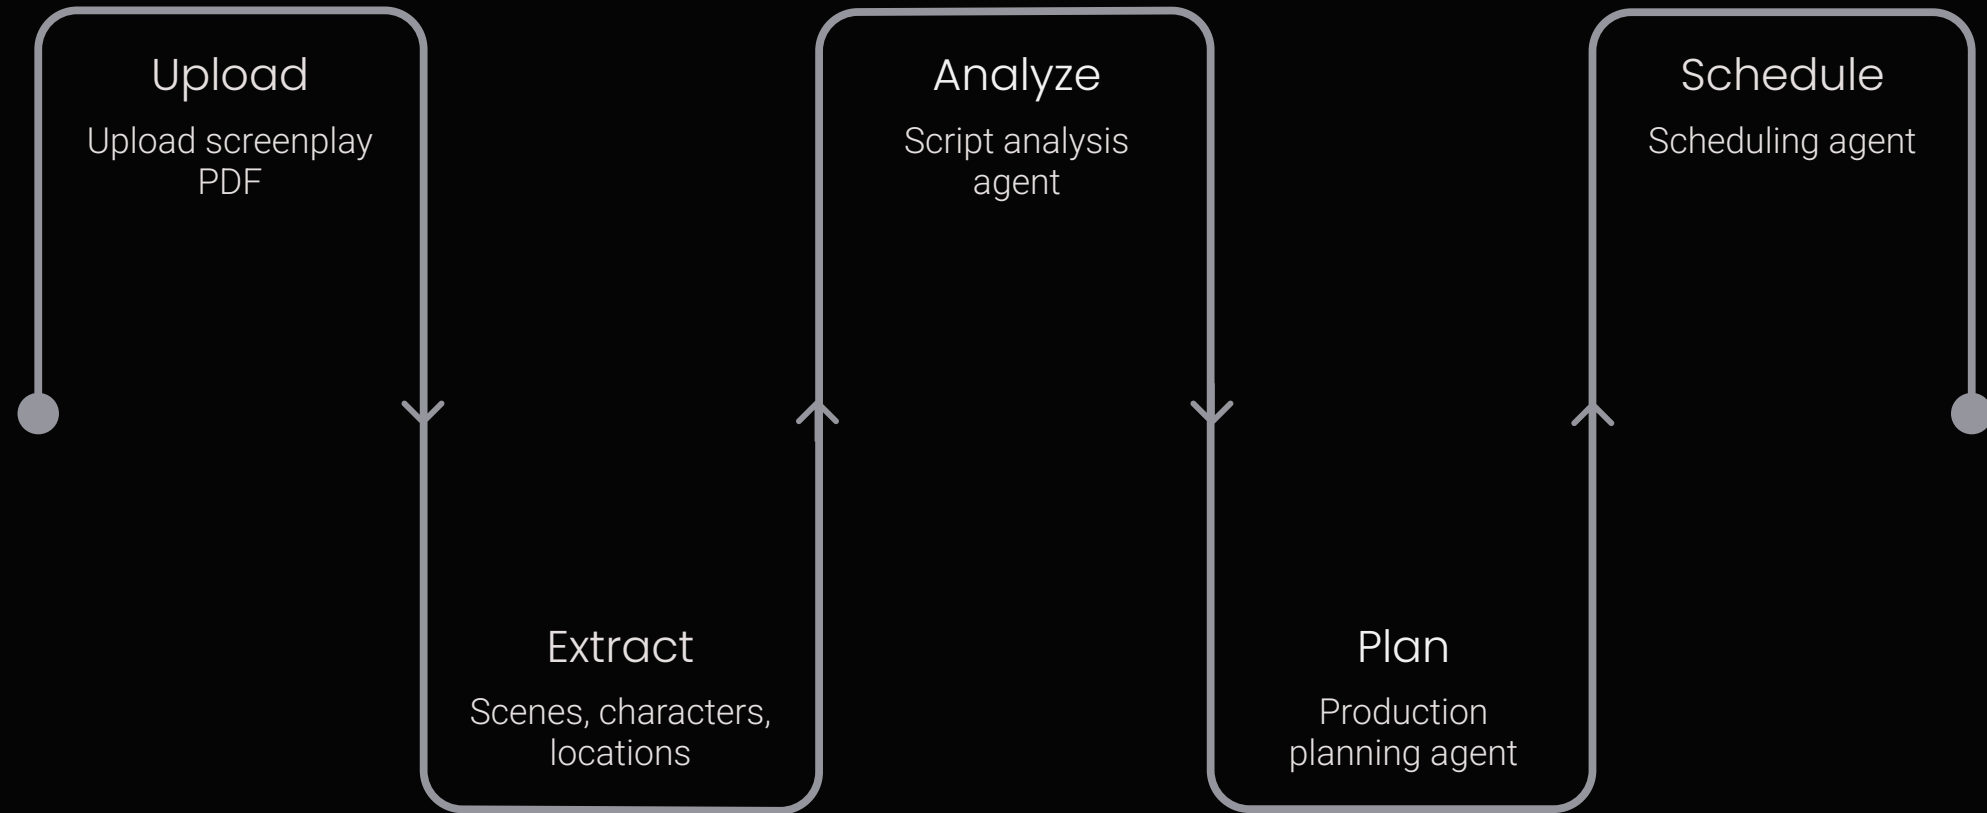

Natural or artificial? Night rig?

 Risk

What could delay production?

 **STORYTELLING INFORMATION ≠ PRODUCTION INFORMATION** — Production teams still translate every scene manually.

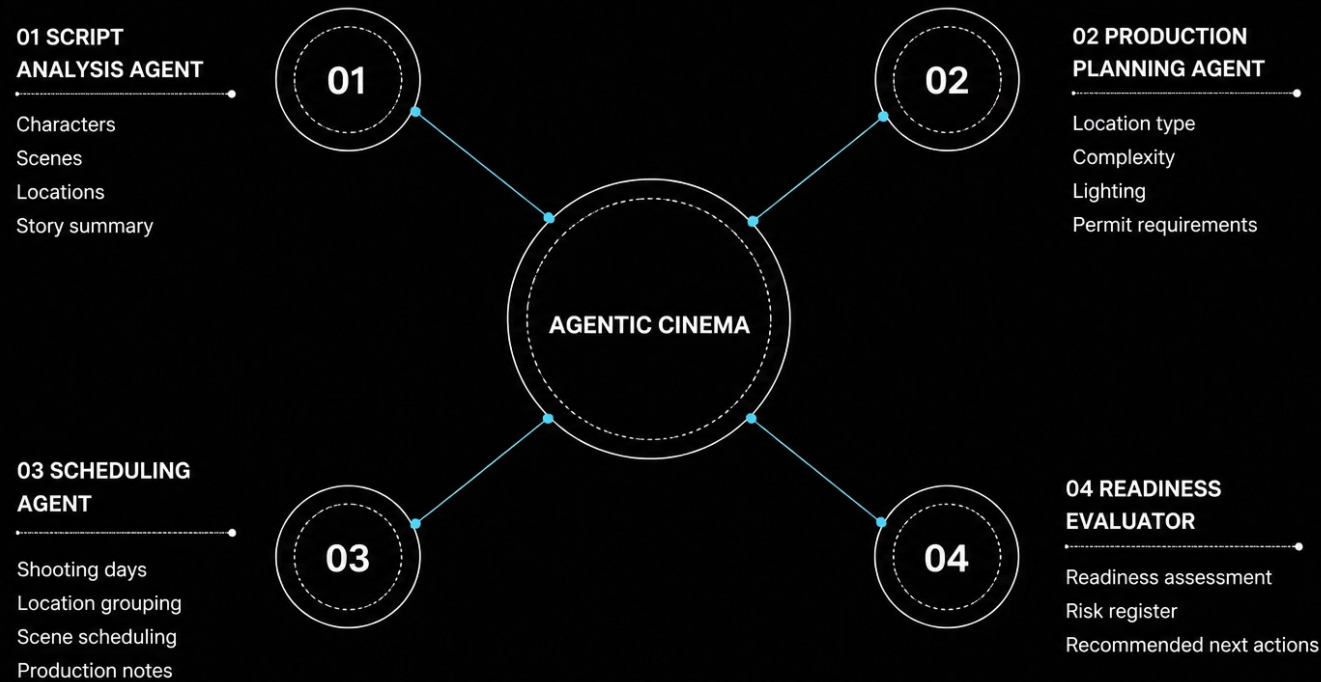

We Turn Screenplays Into Production Intelligence

SCREENPLAY → AGENTS → INTELLIGENCE → DECISIONS

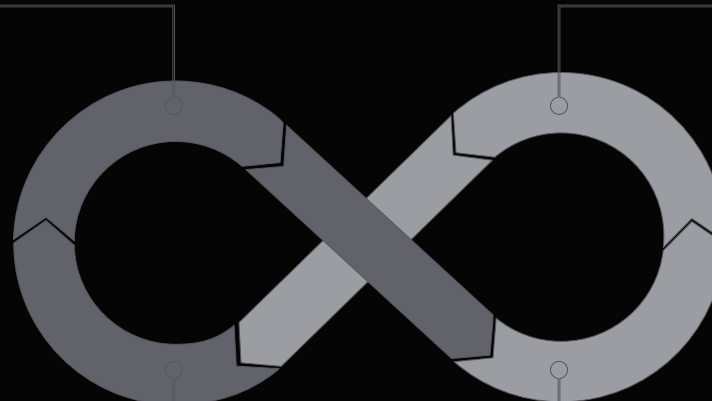

Agentic Cinema automates the tedious early-stage production planning that normally requires manual analysis.

Not One Chatbot. A Team of Specialized Agents.

Dev / Build

AI-based screenplay analysis + agent reasoning

From Script to Shooting Decision

The system doesn't just understand the scene. It understands what the scene *means* for production.

INPUT

"Sarah runs outside to meet John."

AI EXTRACTION

Location: Street
Type: Outdoor
Complexity: High
Lighting: Natural
Permit: Required

PRODUCTION DECISION

Shooting Day 2
Street scenes grouped
Permit + Traffic control
Natural light plan
Backup lighting prep

Script Analysis

Scenes · Characters · Locations

Production Plan

Location · Lighting · Complexity · Permit

Schedule

Day 1 · Day 2 · Day 3

Agent Trace

Analysis → Planning → Scheduling → Readiness

Plan Smarter. Shoot Better.

BEFORE

- Manual screenplay reading
- Manual production planning
- Scattered requirements
- Late risk discovery
- Production uncertainty

- Screenplay → Specialized AI agents
- Production intelligence — instant
- Schedule + risks + readiness
- Risks surfaced before filming
- Better decisions before Day 1

● HIGH RISK

Street location requires permit

→ Start permit application

● MEDIUM RISK

High-complexity outdoor shooting

→ Book technical location scout

● MEDIUM RISK

Lighting dependency on natural light

→ Prepare backup lighting plan

TURNING SCREENPLAY INTO PRODUCTION INTELLIGENCE

Agentic Cinema helps production teams plan faster, identify risks earlier, and make better decisions before filming begins.
